NEW MEXICO DEPARTMENT OF AGRICULTURE

OFFICE OF THE DIRECTOR/SECRETARY
Box 3189/Las Cruces, New Mexico 88003
Telephone (505) 646-3007

TO THOSE INTERESTED IN NEW MEXICO'S AGRICULTURE:

One of the most important jobs New Mexico Department of Agriculture staff performs is publication of the New Mexico Agricultural Statistics, in cooperation with the United States Department of Agriculture's Agricultural Statistics Service. This publication, more than any other material on New Mexico agriculture, provides specific information on the status of agriculture in the Land of Enchantment. Agricultural Statistics is widely read by producers, agribusiness persons, and the lay public which includes the media who often must interpret the situation as it reveals itself.

Additionally, this material is used as reference for planning by most of the agricultural sector and as data for issues that arise pertaining to agriculture and its health. Because statistics on agriculture are so important to the statements generated about this industry, we take special care in providing accurate information, presented in an understandable format.

I hope you will find the 1986 New Mexico Agricultural Statistics helpful and cite it as your most important references on farming and ranching.

Sincerely,

W. P. Stephens

William P. Stephens
Director/Secretary

NATIONAL AGRICULTURAL STATISTICS SERVICE • NEW MEXICO DEPARTMENT OF AGRICULTURE

ACKNOWLEDGMENT

The New Mexico Agricultural Statistics Service, U.S.D.A. in cooperation with the New Mexico Department of Agriculture is pleased to present the 1986 edition of New Mexico Agricultural Statistics. This is the twenty-sixth annual bulletin in a series dating back to 1962 and remains the most popular of our publications, based on subscriber requests.

We have attempted to make these bulletins the most complete accumulation of current statistical data available relating to agriculture in New Mexico. This issue contains the primary data series of State and County estimates for 1986 and comparable data for earlier years.

The data presented in this bulletin are developed primarily from sample surveys conducted by the Service throughout the year. In the past year we have come to rely heavily on a program of probability sampling and enumerative surveys to better support our old stand-by mail surveys, which are slowly being phased out. This has been done to increase the precision of our estimates and more efficiently use available resources. The accurancy of our reports still remains closely related to the degree of voluntary response to our surveys by New Mexico's farmers, ranchers and agribusinesses. A special thanks goes out to the many New Mexico producers who assisted us during the year by providing us with basic data about this states' agriculture.

I also wish to express my appreciation to those individuals who participated in their respective annual county meetings and provided us with their vital input for the county estimates program.

In closing, I want to thank the New Mexico Department of Agriculture for their continued support in assisting with the bulletin preparation and funding its publication. In addition, a special thanks to the staff of the New Mexico Agricultural Statistics Service who's hard work and dedication throughout the year makes this bulletin possible.

Sincerely,

Donald G. Gerhardt

2/ Miscellaneous tonnage includes products unidentified on quarterly reports submitted by manufacturers.

Prices and Income

ASSETS AND DEBTS - New Mexico farm and ranch assets totaled $7,707.9 million for the year ending December 31, 1985. This level represents a 15.5 percent decline from assets one year earlier, and a 22.8 percent drop from assets in 1983. Real estate accounted for 78.2 percent of all assets, as compared to 81.9 percent a year earlier.. Farm and ranch debt in New Mexico totaled $1,321.5 million during the year ending December 31, 1985, 3.2 percent lower than debt in 1984, and 5.5 percent lower than two years earlier. Real estate debt accounted for 55.1 percent of total debt, compared to 57.1 percent one year earlier.

CASH RECEIPTS - The 1986 cash receipts from farm marketings in New Mexico totaled 1,019 million dollars, down 7 percent from cash receipts in 1985. Livestock and livestock products accounted for 69.9 percent of the total and were valued at 712.1 million dollars. Crops, valued at 306.5 million dollars, represented 30.1 percent of cash receipts. Cattle and calves continued to dominate all other commodities, accounting for 50.6 percent of all cash receipts. Wholesale milk was second with 13.2 percent, while hay remained third with 5.8 percent of the total. Chile ranked fourth, representing 3.7 percent. Wheat dropped to fifth, representing 2.6 percent of the total. Sales from these five commodities made up 75.8 percent of all cash receipts in New Mexico farm and ranch marketings during 1986.

FARM INCOME CONCEPTS - Cash receipts from farm marketings represent gross income from the sales of crops, livestock and poultry during the calendar year. The value of home consumption of farm products, inter-farm sales of livestock, and crops fed on farms where grown are not included in cash receipts. Production expenses such as feed, fuel, and fertilizer, and marketing costs are not subtracted from gross cash receipts. County estimates of cash receipts reflect farm productivity of the county to which the income is assigned. Cash receipts from marketings of crops is the final product of several estimates: acreage, yield, percentage of total production sold, average price, and changes in inventories. Marketings of livestock and poultry include the sales value of an animal only once, usually at the time when the animal is sold for slaughter or at final disposition.

Gross farm income includes four principal components: cash receipts from farm marketings, government payments, other farm income, and non-money income. Cash receipts represent gross receipts from commercial market sales as well as loans made or guaranteed by the CCC and other purchases under price support programs. Government payments to farmers are those payments made directly to farm producers in connection with farm programs. Other farm income is cash income from such sources as recreation, machine hire, and custom work. Non-money income includes the rental value of housing provided by farm dwellings and the value of farm products consumed directly in farm households.

Farm production expenses include current farm operating expenses for such items as wages paid to hired farm workers, outlays for repairs of farm equipment and operation of the farm, as well as purchases of oil, feed, and livestock. Overhead-type costs include charges for depreciation and other capital consumption, taxes on farm property, and interest.

Net change in farm inventories is the estimated physical change in livestock and crops owned by farmers, valued at average prices prevailing during the year.

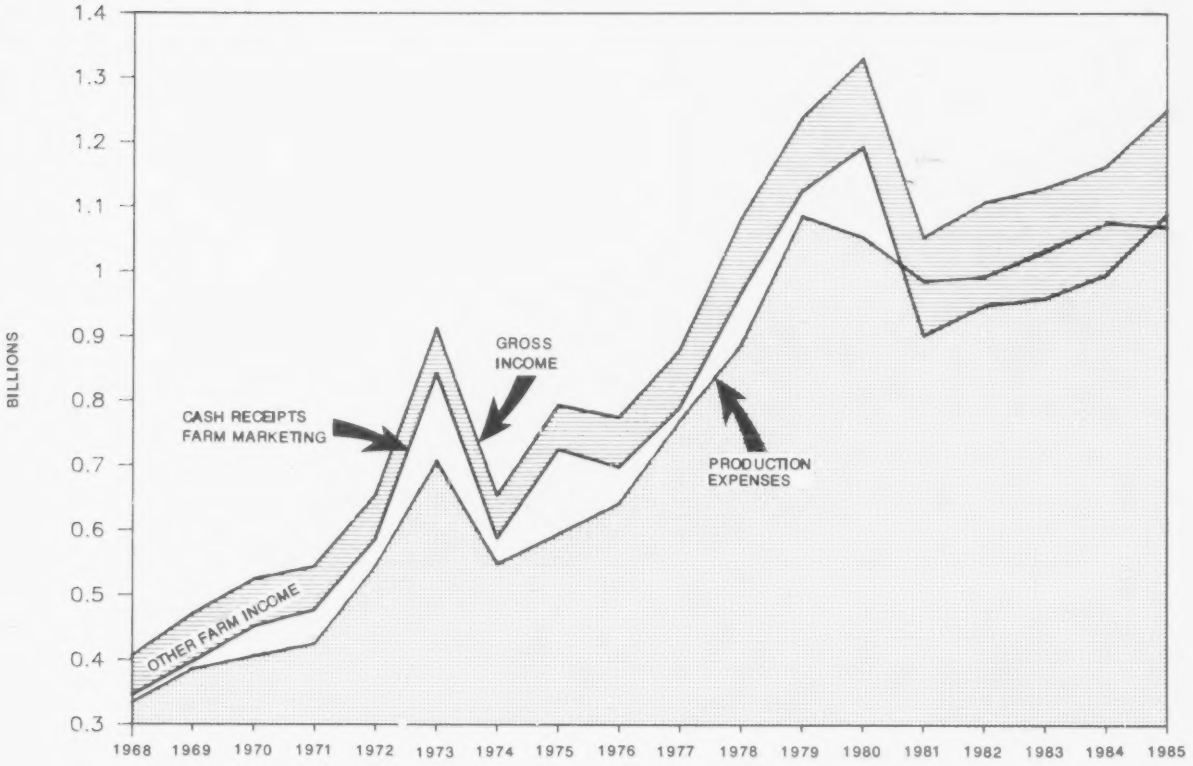
New Mexico Farm and Ranch Income and Expenses 1968 - 1985



INCOME - Gross income on New Mexico farms and ranches for 1985 was $1.25 billion, an increase of 8 percent from 1984, but remained 6 percent below the 1980 record of $1.32 billion. Cash receipts from farm and ranch marketings were $1090.8 million, up 9 percent from 1984. The other items contributing to gross income were: government payments at $44.6 million, down 9 percent; non-money income at $94.6 million, down 6 percent; and other farm income at $22.0 million, up 29 percent. Cash receipts from marketings represented 87 percent of total gross farm income for 1985. Net farm income before inventory adjustment, the difference between gross income and production expenses, at $182.8 million, was up 108 percent from 1984. Total net farm income, which is income after adjustment for inventory change, at $161.5 million was up 39 percent from 1984.

PRODUCTION EXPENSES - Farms and ranches in New Mexico had $1.07 billion in expenses for producing their crops and livestock in 1985, a decrease of $8 million from 1984. This was the first year since 1980 that cash receipts from farm marketings exceeded production expenses.

LIVESTOCK

The winter of 1985-86, although mild, brought little precipitation in the form of rain and snow and resulted in near drought conditions as the 1986 growing season began. On May 1 range and pasture condition was 63 percent of normal. Growth of range forage had been inhibited by lack of moisture and high winds. The first half of May saw a continuation of the weather pattern; however, the last part of the month steadily increasing thundershower activity resulted in above average monthly precipitation at most reporting stations. June and July weather patterns continued to bring above normal precipitation which was conducive for growth and development of range grasses and forbes and on August 1 range and pasture condition was reported at 93 percent of normal - good to excellent.

The fall of 1986 was the best many ranchers could remember and conditions were the best of record, resulting in expectations for a very good year in 1987.

At year's end, the number of cattle and calves on New Mexico's farms and ranches was estimated at 1.36 million head, down 2 percent from January 1986 and 4 percent below 1985. This was in line with U.S. reductions which were down 3 percent from January 1986, to a total of 102 million head. Class estimates on January 1, 1987 were: beef cows, down 2 percent; beef replacement heifers, up 11 percent; milk cows, down 10 percent; milk replacement heifers, down 21 percent; other heifers, up 3 percent; steers, up 1 percent; bulls, down 2 percent; calves, down 5 percent. The 1986 calf crop, at 525,000 head, was down 2 percent.

New Mexico's sheep industry ended 1986 with 480,000 sheep and lambs on hand, down 9 percent from the previous year. Ewes one year old and over, at 342,000 head, were down 4 percent; ewe lambs, at 80,000 head, were up 38 percent; rams and wethers one plus at 20,000 head, increased 5 percent, while ram and wether lambs, at 8,000 head, remained unchanged. The 1986 lamb crop of 300,000 head was down 8 percent.

Hog and pig inventory of December 1, 1986 was estimated at 36,000 head, 5 percent fewer than on December 1, 1985. This level was 3 percent above 1984 and 20 percent above 1983.

FIELD CROPS

New Mexico crop producers saw production fall for most major crops in 1986. Growing conditions during 1986 were not as good as had been realized during the previous two years when production records were set for several crops. Virtually all areas of the State reported a shortage of soil moisture during the winter months causing growers to began irrigation activities sooner than normal. Winter wheat yields dropped drastically from 1985 because of a dry spring and the invasion of the Russian wheat aphid in early spring. Production was down 51 percent from 1985. Other major field crops in the State showed similar declines, but not as drastic. Corn for grain harvested acreage dropped 10,000 acres to 55,000 acres. Yield declined 5 bushels per acre resulting in a production of 8.25 million bushels, an 18 percent drop from 1985. Sorghum grain harvested acreage was 230,000 acres, 60,000 acres less than in 1985. Yield declined slightly to 45 bushels per acre for a total production of 10.35 million bushels, 26 percent below the previous year. Alfalfa hay production for 1986 totaled 1.2 million tons, a drop of 100,000 tons from 1985. Other crop production figures and percentage declines were: barley, 1.04 million bushels, 1 percent; peanuts, 28.70 million pounds, 10 percent; potatoes, 2.79 millon cwt., 2 percent; and upland cotton, 62,000 bales, 13 percent. Only American-Pima cotton realized an increase in production during 1986. Bales produced during 1986 totaled 16,600 bales, compared to 11,300 bales in 1985. Prices, which started to slump in 1985, continued downward during 1986. This, combined with the lower production, resulted in a considerable drop in value for most 1986 crops.

Wheat

Bushels Produced, 1986

Wheat production in New Mexico fell to 10,120,000 bushels during 1986. This level was 51 percent below the record 1985 crop and was the lowest production since 1979. Area planted to the 1986 crop was 740,000 acres, 10,000 acres greater than in 1985; however, harvested acreage fell to 460,000 acres, 110,000 acres less than was harvested in 1985. Yield per acre dropped dramatically in 1986. Growers harvested an average 22 bushels per acre, 14 bushels lower than the record 36 bushels per acre harvested in 1985. Prices received by wheat farmers also dropped sharply in 1986. An average of $2.25 per bushel was received for the 1986 crop, down 65 cents per bushel from the previous year, and the lowest season average price since 1977. With the combined effects of lower harvested acreage, yield and price, the total value of production fell to $22.8 million, 62 percent below 1985.

FRUITS, NUTS AND VEGETABLES

New Mexico apple orchards decreased in production in 1986. Freeze and hail damage was widespread throughout the state. Apple growers produced 6 million pounds of the fruit in 1986, a decrease of 4 million pounds, or 40 percent, less than in 1985. The price received by apple producers averaged 19 cents per pound, or $7.60 per bushel. This compares with $5.55 per bushel received for the 1985 apple crop. Value of the 1986 crop dropped 15 percent to $1,140,000.

1986	**27000**	**91.0**	**24570**

New Mexico's 1986 pecan production was 27.0 million pounds, in-shell basis, 7 percent below the previous year's crop of 29.0 million pounds. The 1986 production is the second highest on record. The record high production was set in 1983 and 1985 with 29.0 million pounds. The harvest of the 1986 crop was hampered by poor weather.

Prices received by New Mexico pecan growers were 3 cents, or 3 percent, higher than prices received for the 1985 crop. The value of the 1986 crop was 24.57 million dollars, 4 percent below the value one year earlier.

Lettuce, a cool season crop, has two distinct growing seasons in New Mexico: spring and fall. Spring lettuce production for 1986 was 432 thousand hundredweight, 21 percent greater than the previous year's level. Fall production was 293 thousand hundredweight, 2 percent below fall production in 1985. The average spring price per hundredweight was 17.22 dollars while the average fall price was 9.02 dollars. The combined spring and fall value was 10.1 million dollars, 75 percent greater than the value of the 1985 spring and fall crops.

The major varieties of commercially grown onions in New Mexico include Grano, Granex, Sweet Spanish, and Mid-Summer Hybrids. Onions grown in New Mexico are primarily shipped for fresh market. Harvest usually begins in late May and continues through September. New Mexico onion production in 1986 was 1,810 thousand hundredweight, up 23.7 percent from the previous year's production of 1,463 thousand hundredweight. The total value of production was 17.2 million dollars, a decrease of 8.6 percent over 1985's level. The majority of the acreage devoted to onion production was located in Dona Ana and Luna counties. These counties accounted for almost 86% of the harvested acreage.

Production from the 1986 chile crop set a new record high at 35,360 dry equivalent tons. The previous record was made in 1985 with 29,900 dry equivalent tons. This increase in production is attributed to a 14.5 percent increase in harvested acreage from the previous year. Acreage in the State is estimated at 22,100 acres. The value of production also set a record high at 37.3 million dollars. The average price received by farmers decreased 71 dollars per dry equivalent ton to 1,054 dollars. Yield per acre increased 3 percent from last year to 1.60 dry equivalent tons. The amount of processed green chile increased 2,580 tons over 1985 to 37,880 tons. Processed red chile tonnage increased 25 percent to 18,810 tons. Of the total processed green tonnage, 83 percent was of mild varieties. Of the total processed red tonnage, 86 percent was of mild varieties.

Commercial grape acreage in New Mexico is estimated at 3,800 acres for 1986. The 1984 and 1985 acreage was revised downward to 3,670 acres and 3,740 acres respectively, based on survey response. New plantings of grapes in New Mexico increased by about 60 acres in 1986.

Commercial vineyards operating in New Mexico number approximately 70, with 18 winemaking facilities now in operation. Over 75 percent of the grape acreage is located in Luna, Sierra and Grant counties. The number of vines is estimated at 2,894,000. The 1984 and 1985 figures were revised downward to 2,426,000 and 2,848,000 respectively.

Grape production increased from the levels attained in 1985 to approximately 3,500 tons. Production would have been greater, but was hampered by grasshopper infestations and late, bud damaging freezes. Of the 3,500 tons produced, approximately 90 percent were used for commercial and domestic wine making purposes. The remaining tonnage was primarily sold as fresh market table grapes or used for other purposes.

PUBLICATIONS ISSUED BY THE NEW MEXICO AGRICULTURAL STATISTICS SERVICE

NEW MEXICO AGRI-INFO

A 2-4 page report issued twice monthly. Major topics include:

---Agricultural Prices - Monthly
---Grain Stocks - Quarterly
---Cattle on Feed - Quarterly
---Livestock Shipments - Quarterly
---Milk Production and Cow Numbers - Quarterly
---Egg Production - Quarterly
---Vegetables, Fruits, and Nuts - Seasonal
---Range and Pasture Conditions - May through November
---Crop Moisture Map - May through November
---Wool Production - April
---Hogs and Pigs - Quarterly
---Livestock Slaughter - Monthly

WEEKLY CROP WEATHER

A 2 page report issued each Monday.

---Temperature and Precipitation for Selected Locations
---State Weather Summary
---Crop Conditions and Progress
---Range and Livestock Conditions

CROP ACREAGES AND PRODUCTION

A 2-4 page summary issued after each of the four major crop surveys (February Intentions, June Acreage, Wheat Seedings, Annual Summary).

LIVESTOCK INVENTORY AND PRODUCTION

A 2 page summary issued annually for cattle and calves, sheep and lambs, and dairy.

CHILE SUMMARY

A 2 page annual summary of the New Mexico chile crop issued in March.

GRAPE SUMMARY

A 1 page annual summary of the New Mexico grape crop issued in March.

NEW MEXICO AGRICULTURAL STATISTICS
